Fig.1 Data of IT Companies based in Pune

## 2. Data Visualization using PowerBi:

- Conducted exploratory data analysis on initial datasets, using descriptive statistics and basic visualizations to identify trends and patterns.
- Implemented data transformation techniques such as data aggregation, formatting, and feature engineering to prepare data for analysis.

## 3. Data Selection & Dashboard Creation:

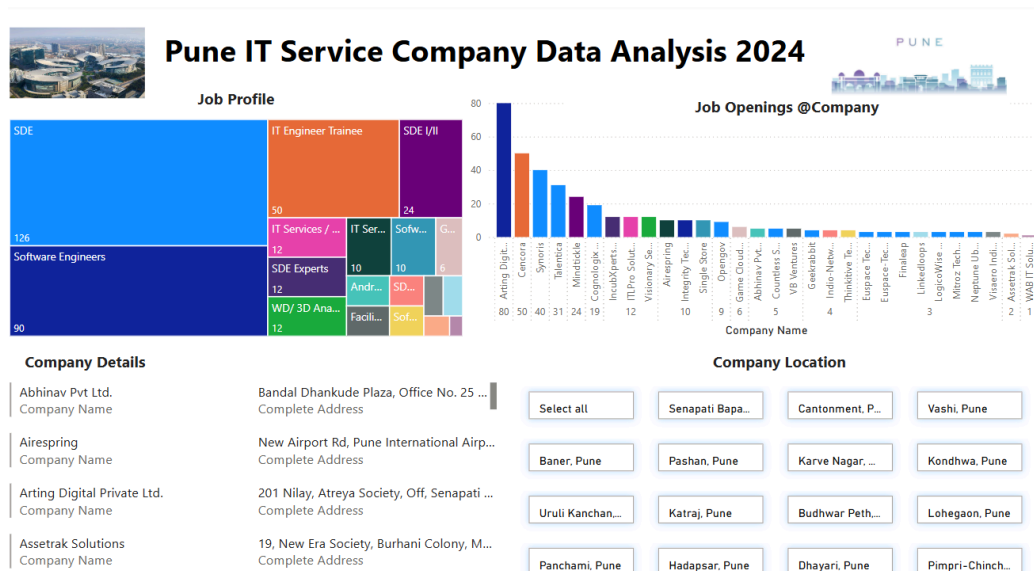

Fig.2 Dashboard representing the data of the IT Companies based in pune

#### 4. Analysis of Job Openings by Location:

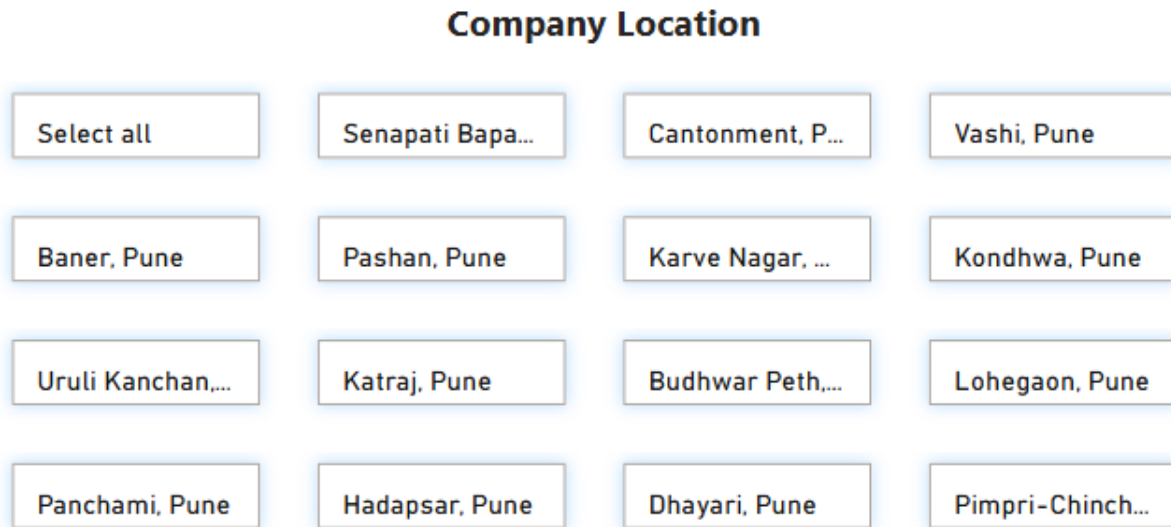

Fig.3. It represents the statistics of the Number of Companies distinguished by location.

#### 5. Analysis of Job Openings by Company Name:

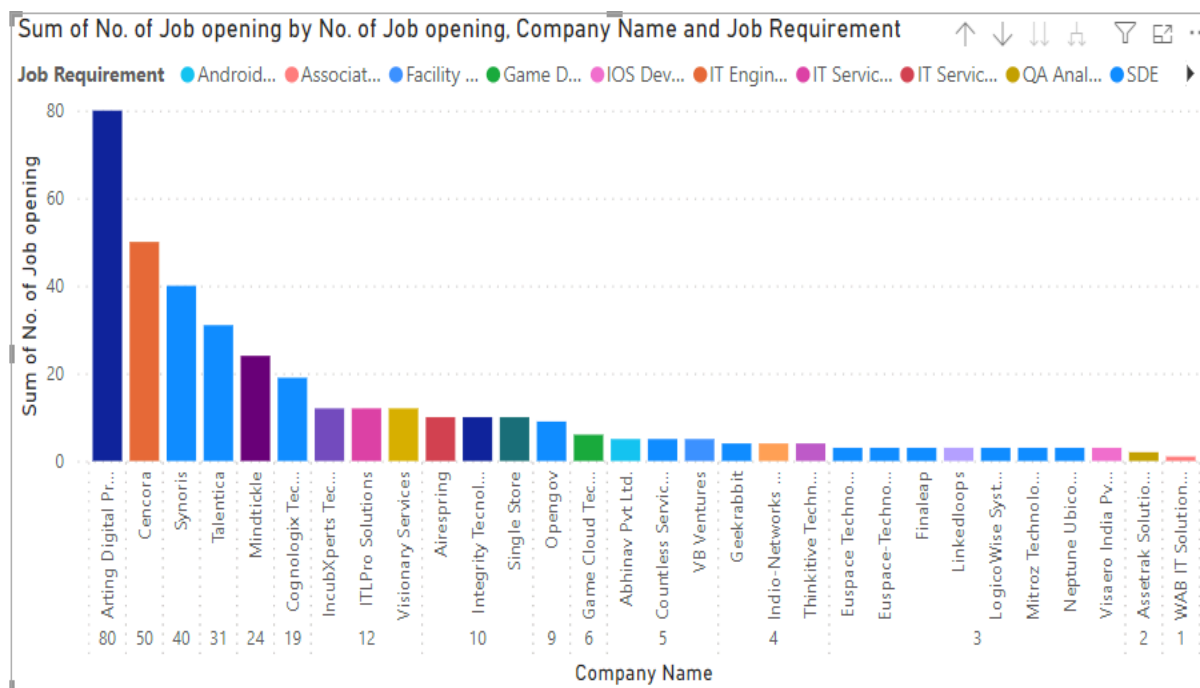

Fig.4 It represents the number of job openings in the particular company.

#### Examination of Job Openings:

- Identify the distribution of job openings across different IT companies.
  - Analyze the prevalence of job opportunities within specific companies compared to others.
  - Company Ranking:
    - Rank companies based on the number of job openings they offer.
    - Highlight the top companies with the highest number of job openings.
6. Analysis of Job Openings by Number of Job Requires:

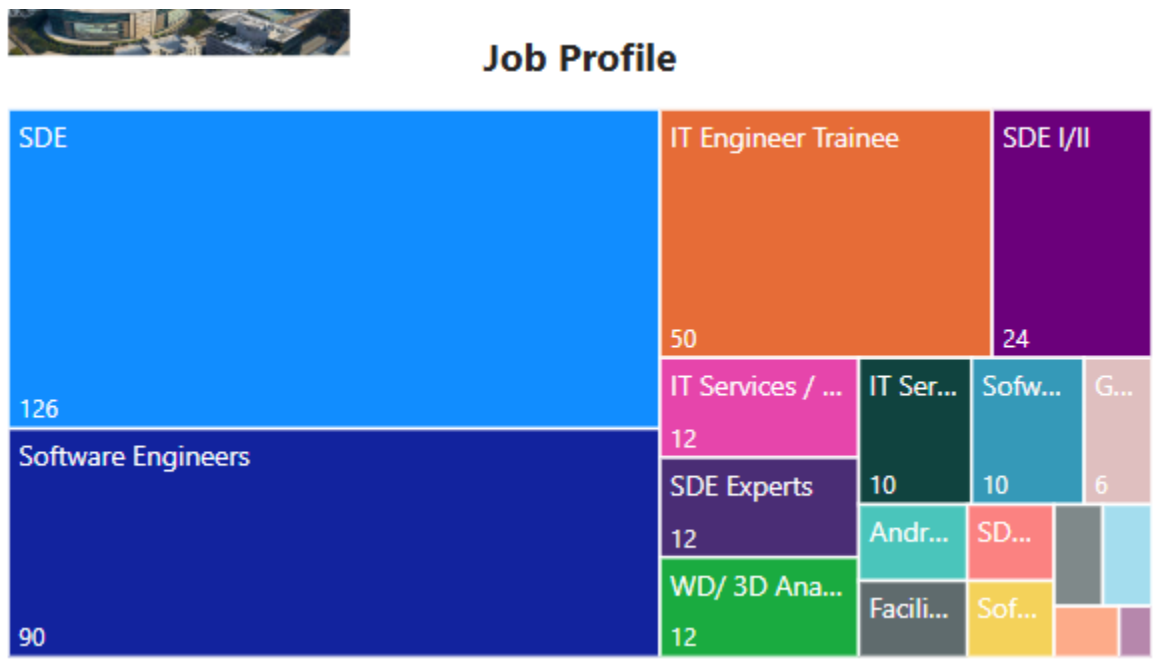

Fig.5 It represents the pie chart of the Number of companies along with their Job openings.

- Comparison of Job Openings:
  - Analyzed the distribution of job openings based on the number of job requirements specified by each company.
  - Segmented job openings into categories based on the number of required skills or qualifications.
- Insights into Job Requirements:
  - Identified trends in the number of job requirements across different positions and company sizes.
  - Examined whether job openings with higher requirements tend to be associated with specific job roles or industries.

## Tasks and Accomplishments:

### 1. Company Research & Finding the Targeted Clients

- Did the research and found the Small Scale and Medium Scale IT Companies based on the Employee size, Revenue, Company Founded, and Resource.

- Prepared the detailed Report analysis report of the Data collected

2. Prepared the Visual Dashboard for the company

- Created a lucrative Dashboard for the Company and did a detailed analysis.
- Helped the Company to take the Business decisions based on the Reports generated.

3. Helped them to replace the Mundane tasks with the lucrative Solutions:

- The Reports generated were powerful and more focused. It narrowed down their search of the Targeted clients.
